Pratik Gelal

Frontend Developer Intern

Motivated BSc (Hons) Computer Science with Artificial Intelligence student with strong interest in social media management and content creation. Experienced in creating YouTube content and managing social media platforms. Quick learner with good communication skills and a creative mindset.

ACHIEVEMENTS

Hackathon

Participated in the TriCode Hackathon, collaborating with a team to develop innovative solutions to real-world problems under time constraints.

Academic / Skill-Based

Pursuing BSc (Hons) Computer Science with Artificial Intelligence with strong focus on Python and AI development

EXPERIENCE

YOUTUBE CHANNEL HOLDER

Youtuber / November, 2020 - Present

"I am interested in creating videos and going live on YouTube, and I love managing social media accounts."

PROJECTS

VITAPULSE – AI-Based Smart Healthcare Assistant (Group Project)

Collaborated with a team to design and develop an AI-powered healthcare web application using Python, Flask, HTML, CSS, JavaScript, and MySQL. Contributed to building a responsive user interface and implementing key features such as BMI calculator, calorie tracking, AI chatbot, first aid guide, medicine reminders, sleep tracking, health dashboard, and user authentication, with secure database integration.

BETDICT – AI-Powered Sports Prediction Platform

Designed and developed an AI-powered sports platform focused on Cricket and Football using Python (Flask), HTML, CSS, JavaScript, MySQL, Sports APIs, and Groq AI. Features include live scores, match schedules, AI-based match predictions, an admin-controlled live streaming system, and a comprehensive admin dashboard for managing matches, news, and website content. Integrated real-time sports data and AI-powered insights to enhance the user experience.

Portfolio

Designed and developed a personal portfolio website showcasing my projects and skills.
