English - Expert
Hindi - Expert
Nepali - Expert

SUMMARY

BSc (Hons) Computer Science with Artificial Intelligence student combining hands-on software development experience with proven social media and digital marketing skills. Built a full-stack healthcare web application and currently manage end-to-end social media and content strategy for an international company. Quick learner with strong communication skills and a track record of shipping real projects.

EDUCATION

BSc (Hons) Computer Science with Artificial Intelligence

Softwarica College (Affiliated with Coventry University) / September, 2025 - Present

+2 Science

Khwopa Higher Secondary School / Bhaktapur / August, 2023 - May, 2025

WORK EXPERIENCE

Social Media & Marketing Manager

Matrix Tiers / New Brunswick, Canada / June, 2026 - Present

- Own end-to-end social media presence and digital marketing activity for the company, creating and publishing videos, images, and promotional content.
- Grow brand awareness and followers by distributing content across relevant Facebook groups, Reddit, and Quora communities.
- Research and identify potential B2B customers across New Brunswick to support outreach and lead generation.
- Promote Matrix Tiers' wholesale tire products, warehouse locations, and delivery services to target audiences.

Content Creator

Independent YouTube Channel / November, 2020 - Present

- Grew and manage a channel of 2,100+ subscribers, independently planning, filming, editing, and publishing original video content and live streams for over 4 years.
- Apply consistent content and audience-growth strategy, building practical experience in video production and social platform management.

TRAINING/CERTIFICATIONS

Responsive Web Design (HTML & CSS)

freeCodeCamp , 2025

Completed a self-paced, project-based certification covering semantic HTML, CSS layout (Flexbox and Grid), and responsive design principles; built multiple hands-on projects to apply core front-end concepts.

PROJECTS INVOLVED

VITAPULSE – AI-Based Smart Healthcare Assistant (Group Project)

- Collaborated on an AI-powered healthcare web application using Python, Flask, HTML, CSS, JavaScript, and MySQL.
- Built responsive front-end interfaces and contributed to core features including a BMI calculator, calorie tracker, AI chatbot, first-aid guide, medicine reminders, sleep tracker, health dashboard, and secure user authentication.
